Acta stomatologica Croatica i Emerging Sources Citation Indexa (ESCI)

Hrvoje Brkić, glavni urednik

Sažetak

Acta stomatologica Croatica od volumena 52 (1) : 2018., postala je dio baze Emerging Sources Citation Indexa (ESCI). ESCI je novi citatni indeks i dio je Clarivate Analyticsove zbirke citatnih indeksa unutar Web of Science Core Collectiona (WoSCC). Dio zbirke još su SCI-EXPANDED, SSCI, A&HCI i neki drugi. Svi indeksi dostupni su na platformi Web of Science. Časopisi koji žele biti indeksirani u citatnim indeksima SCI-EXPANDED, SSCI ili A&HCI, najprije moraju biti u ESCI-u. Nakon nekog vremena, ako zadovolje kriterije Clarivate Analyticsa, uspjeh će prijeći u druge citatne indeksne baze.

Ključne riječi

Acta stomatologica Croatica, ESCI, WoSCC

Dragi čitatelji!

Publicistička aktivnost časopisa Acta stomatologica Croatica kontinuirano traje već 52 godine.

Cijelo to vrijeme, a posebno posljednjih dvanaest godina otkako smo se uključili u online otvoreni pristup, čitavnost objavljenih članaka postala je vrlo velika. I zato uredništvo neprestano, iz sveščića u sveščić, nastoji još više poboljšati kvalitetu. Tomu u prilog jest i informacija da je naš časopis, od volumena 52 (1) : 2018., postao dio baze Emerging Sources Citation Indexa (ESCI).

ESCI je novi citatni indeks i dio je Clarivate Analyticsove zbirke citatnih indeksa unutar Web of Science Core Collectiona (WoSCC). Dio zbirke još su SCI-EXPANDED, SSCI, A&HCI i neki drugi. Svi indeksi dostupni su na platformi Web of Science. Časopisi koji žele biti indeksirani u citatnim indeksima SCI-EXPANDED, SSCI ili A&HCI, najprije moraju biti u ESCI-u. Nakon nekog vremena, ako zadovolje kriterije Clarivate Analyticsa, uspjeh će prijeći u druge citatne indeksne baze.

Svjetske indeksne baze časopisa imaju vrlo stroge kriterije za uključivanje novih časopisa. Zato je prihvaćanje novog časopisa indirektna potvrda njegove kvalitete. Znatno se povećava vidljivost objavljenih radova. Budući da autori svoje najkvalitetnije radove šalju u indeksirane časopise, time se pokreće uzlazna spirala u životu časopisa.

Vjerujem da ćete pronaći vremena i pročitati članke objavljene u ovom sveščiću te da ćete dobiti ideju za istraživanja čije rezultate možete objaviti u časopisu Acta stomatologica Croatica.

Acta stomatologica Croatica and Emerging Sources Citation Index (ESCI)

Hrvoje Brkić, editor-in-chief

Abstract

Acta stomatologica Croatica is, since volume 52 (1): 2018, included in Emerging Sources Citation Index (ESCI). ESCI is a new citation index, part of the Clarivate Analytics group of citation indexes inside the Web of Science Core Collection (WoSCC). Members of this group are SCI-EXPANDED, SSCI, A&HCI and some other indexes. All of these are accessible on Web of Science platform. Journal that aspire to be indexed in citation indexes SCI-EXPANDED, SSCI or A&HCI, first have to access ESCI. After some time, if they meet the criteria of Clarivate Analytics, they might be able to transfer to other citation index databases.

Key words

Acta stomatologica Croatica, ESCI, WoSCC

Dear readers,

The publishing activity of Acta stomatologica Croatica is continuing its 52nd year. All of this time, but especially in the last twelve years, since we have enabled open access, the number of reads of the published articles is soaring. It is why the editorial office is continuously trying, from issue to issue, to enhance the quality of the journal. A shining new proof of that is that our journal is, since volume 52 (1): 2018, included in Emerging Sources Citation Index (ESCI).

ESCI is a new citation index, part of the Clarivate Analytics group of citation indexes inside the Web of Science Core Collection (WoSCC). Members of this group are SCI-EXPANDED, SSCI, A&HCI and some other indexes. All of these are accessible on Web of Science platform. Journal that aspire to be indexed in citation indexes SCI-EXPANDED, SSCI or A&HCI, first have to access ESCI. After some time, if they meet the criteria of Clarivate Analytics, they might be able to transfer to other citation index databases.

International index databases have very strict criteria that new journals have to achieve. Therefore, the acceptance of a new journal is a confirmation of its quality, and it increases the visibility of the journal tremendously. Since the authors send their best work to the indexed journal, this process starts the upward spiral of a journal's life.

I believe you will find the time to read the articles in this issue. I hope it will give you inspiration for research whose results you may publish in Acta stomatologica Croatica.
